

# Crosswinds Aviation Aircraft Parking

Please reference the picture below

- ✓ The yellow boxes as well as inside our hangar are where aircraft can be parked.
- ✓ We ask if you are not in the act of taxiing in or out that you remain inside our yellow zones showed below and keep the middle area free.
- ✓ The middle area in front of the door can be used to pull in and park temporarily. Before leaving the aircraft, it must be moved to one side of the ramp within the yellow box, or into the hangar. This allows other aircraft to enter/exit from the hangar without obstruction.
- ✓ If you utilize the mowed grass area we ask you park back approximately 20 feet to allow wing overhang from large planes also using the ramp.
- ✓ If you need help getting your plane into one of these places, please let Crosswinds staff know immediately.
- ✓ Overlap planes when possible as indicated with the white stars to fit as many aircraft on each side of the ramp area.
- ✓ The staff at Crosswinds Aviation thanks you in advance for your understanding and help keeping our ramp space orderly. Please let us know if you need any assistance in aircraft movement.
